Innovation of creativity in teaching learning

The biggest challenge any teacher faces is capturing the students' attention, and putting across ideas in such a way that it stays with them long after they have left the classroom. For this to happen, classroom experience should be redefined and innovative ideas that make teaching methods more effective should be implemented. So here are some innovative ideas that will help teachers reinvent their teaching methods and make their classes interesting.

1. Creative Teaching

Take the help of creative tools to stimulate creativity. Include playful games or forms of visual exercises that will excite the young minds and capture their interest. This is a time tested method to identify young students' creative abilities and encourage creative contributions. Bring aspects of creativity into all your subjects, be it mathematics, science, or history. Think of ways to develop their creative ideas. Encourage different ideas, give them freedom to explore

2. Audio & Video Tools

Incorporate audio-visual materials in your sessions. Supplement textbooks with models, filmstrips, movies and pictorial material. Use info graphics or other mind mapping and brain mapping tools that will help their imagination thrive and grow. These methods will not only develop their ability to listen, but will also help them understand the concepts better. For example, you can get some oral history materials, conduct live online discussions or playback recordings of public lectures. There are a lot of smart apps for preschoolers that you can utilize to create awesome slideshows or presentations

3. Real-World Learning

Link your lessons to real world learning. Infusing real world experiences into your instructions will make teaching moments fresh and enrich classroom learning. Relating and demonstrating through real life situations, will make the material easy to understand and easy to learn. It will spark their interest and get the children excited and involved. You can make use of smart apps for preschoolers to make these sessions all the more interesting

4. Brainstorm

Make time for brainstorming sessions into your classrooms. These sessions are a great way to get the creative juices flowing. When you have multiple brains focusing on one single idea, you are sure to get numerous ideas and will also involve everyone into the discussion. These sessions will be a great platform for students to voice their thoughts without having to worry about right or wrong. Set some ground rules before you start. You can go for simple brainstorming or group brainstorming or paired brainstorming

5. Classes Outside the Classroom

Some lessons are best learnt, when they are taught outside of the classroom. Organize field trips that are relevant to the lessons or just simply take students for a walk outside of the classroom. The children will find this fresh and exciting and will learn and remember the things taught faster. Role playing is most effective for students of almost any age group. You just need to customize depending on the age group. You can even use this method for teaching preschoolers; just make sure you keep it simple enough to capture their limited attention span

6. Role Play

Teaching through role play is a great way to make children step out of their comfort zone and develop their interpersonal skills. This method comes in handy, especially when you are teaching literature, history or current events. The role playing approach will help the student understand how the academic material will be relevant to his everyday tasks

7. Stimulating Classroom Environment

A classroom environment that is well-decorated, fun, and engaging will help stimulate a student's mind and will help think and learn better. Children, especially young ones cannot be expected to sit all day and learn. Such creative and stimulating environment will help them explore and will encourage them to learn about the subject. An environment that positively impacts the children is beneficial for the teacher as well. Schools associated with [Early Years Foundation Stage](#) (EYFS) will vouch for the fact that the learning environment has a prime role in learning and development

8. Welcome New Ideas

An open-minded attitude can help you innovating new teaching methods. Though open-minded, sometimes most of us show reluctance to new ideas. If you're a teacher never do this, always try to accept new ideas even if it looks like strange at the beginning

9. Work Together As a Team

As everyone knows, the end result of collaborative efforts is always immense. Think about spending some quality time with your colleagues. Ask them to share their views on improving teaching methods, you can see many of them come up with interesting strategies. So, collaborate and introduce innovative teaching methods.

10. Refer Books On Creativity

To be a creative teacher, you need to do some research on creative ideas and techniques. There are a lot of books on creativity. Choose some of the best works and start learning, it will be helpful for your professional development as well.
